

# Our Connected *Future*

***There is a saying that the best way to predict the future is to CREATE IT.***

*That's what leaders do.* Wabash puts great stock in leveraging our transportation, logistics and distribution ecosystem to ensure we are prepared to weather shifts as well as to take advantage of opportunities on our horizon.

That's why events like ***Ignite 2024*** are key. Convening thought leaders and industry experts – connecting across the ecosystem – is how we can best prepare for and deal with truly complex and nuanced issues, such as A.I. and the exponential influx of data, and where and how innovation, sustainability and strong partnerships must align to tackle the challenges facing the industry.

Wabash believes issues and opportunities that affect all, should be addressed by all – working together. When it comes to the future for our companies, ***Ignite 2024*** has planned content, such as:

- **The Future of Transportation from (Before) the First to (After) the Final Mile:**  
*Leveraging Technology to Remove Cost and Waste, Improve Freight Efficiency and Enable True Sustainability Gains*
- **Digital Evolution:** *Redefining Possibilities for a Connected World*
- **Unlocking the Future of Business Success:**  
*Transforming B2B Relationships from Transactions to Strategy*

Given the rate of change in our world, we are likely to see as much change in the next few years as most of us have seen in our entire careers. Some issues that once seemed off in the distance are already here or approaching FAST. Let's come together at ***Ignite 2024*** to become smarter and even more strategic when it comes to matters involving government regulations, E2E Supply Chain opportunities, data and environmental and sustainability efforts – to name a few.

***Create YOUR FUTURE at Ignite 2024.***
